

Utility Based Incentives

Atlantic City Electric EV Incentive Programs: Offers rebates and make ready incentives for residential and commercial EV chargers. Up to \$75,000 for utility service upgrades for DC fast chargers. More details can be found here , [Atlantic City Electric EV Programs](#).

Jersey Central Power & Light (JCP&L) EV Driven Program: Offers make ready incentives for residential and commercial EV charging. Currently not accepting new applications but subject to future funding: More details can be found here: [JCP&L EV Program](#).

PSE&G EV: PSE&G offers generous incentives for EV charger installations, including up to \$7,500 per Level 2 (L2) charger and \$25,000 per DC fast charger for behind-the-meter work, plus up to \$10,000 and \$50,000 respectively for utility service upgrades. Residential customers can snag up to \$1,500 for L2 installation and \$5,000 for upgrades, with added savings through off-peak charging rate credits. All incentives can be combined with state and federal grants but are capped at 90% of the total project cost. More Information can be found here: [PSE&G EV Programs](#)

Rockland Electric EV Charging Program: Covers up to 90% of make ready costs for commercial and residential EV Chargers. More details can be found here: [Rockland EVs](#)
