2024 CLEAN CITIES & COMMUNITIES ACTIVITY REPORT NOW AVAILABLE

The Clean Cities and Communities Partnership 2024 Activity Report is now available. This report summarizes 2024 annual data from all coalitions, highlighting the impact of key partnership activities. Thank you for participating in the CC&C annual reporting process. Data-driven analysis from coalition reporting shows how coalitions advance locally driven transportation energy choices on a national scale.

JOB BOARD

NJCCC Job Board: Connecting Talent with Opportunity

NJCCC is excited to announce our new employment initiative designed to connect job seekers and employers across New Jersey's transportation and energy sectors. As part of NJ Clean Cities Membership, this new self-service platform will allow users to post and explore job opportunities through our website.

FIND YOUR NEXT HIRE

Finding the right talent starts with reaching the right audience. As an NJCCC member, you can showcase your organization's job opportunities to a growing network of professionals, students, and industry leaders across New Jersey's clean transportation, energy, and sustainability sectors. This exclusive member benefit helps increase the visibility of your openings at no additional cost.

FIND YOUR NEXT OPPORTUNITY

Grow your professional network and connect with employers across New Jersey's transportation, energy, and sustainability sectors through a complimentary "Energy Position Wanted" listing. As an exclusive NJCCC member benefit, your listing will be featured on the NJCCC website for up to three months and highlighted in the NJCCC newsletter during its first month, helping you increase your visibility to potential employers.

HOW TO GET STARTED

Complete the submission [form](#)

1

- Employers can advertise open positions.
- Job seekers can post an "Energy Position Wanted" listing.

2

Once approved, your listing will be posted on the NJCC website for up to 3 months and featured in the NJCC newsletter during its first month.

3

Reach employers, job seekers, and professionals across New Jersey's clean transportation, energy, and sustainability sectors.

JOB BOARD

Job Opportunities

PRINCETON UNIVERSITY

FLEET PROGRAM MANAGER

Princeton University is seeking a Fleet Program Manager to lead the development and management of its newly centralized fleet program. This role will oversee the University's 650-vehicle fleet, implement fleet management and telematics systems, coordinate vehicle lifecycle planning, and work across departments to improve efficiency, sustainability, and data-driven decision-making. Ideal candidates have 5–8 years of experience in fleet management or transportation operations and a passion for building innovative, high-performing fleet programs.

Position Details: Full-time, in-person position with a salary range of \$85,000 to \$100,000

How to Apply: Interested candidates can apply through the [Princeton University careers website](#).

QUESTIONS?

Contact Fatma at njcccjobs@gmail.com.

FUNDING & RESOURCES

ELECTRIC SCHOOL BUS GRANT PROGRAM

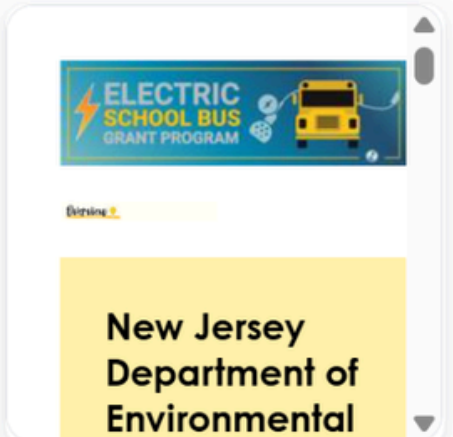

The New Jersey Department of Environmental Protection's (NJDEP) Electric School Bus Program has generous incentives to help with the transition.

Application period for Round 3 is **NOW OPEN**

FUNDING & RESOURCES

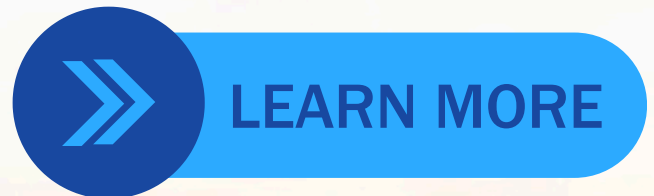

RGGI Medium and Heavy-Duty EV Charging Grant

**DEADLINE
EXTENDED
JULY 31, 2026**

Applications open: January 1, 2026
Applications close: May 31, 2026
Application: <https://njbpu.intelligrants.com>
More information: <https://njcleanenergy.com/ev>

Awards: Awards may not exceed \$225,000 per public DCFC in community locations. Program Applicants may apply for up to six (6) eligible 150 kW or greater DCFC EV charging stations.

Eligible Applicants: An Applicant must be a registered business in New Jersey located, or primarily operating, in an OBC.

FUNDING & RESOURCES

Funding Available for Local Government On-Road Medium & Heavy-Duty Vehicle Electrification

The New Jersey Department of Environmental Protection (NJDEP) continues to provide funding to electrify local government medium- and heavy-duty diesel vehicles, reinforcing New Jersey's dedication to reducing diesel emissions, combating climate change and improving air quality and public health. Eligible local governments are encouraged to apply for this first-come, first-served basis to electrify their fleets and help create a cleaner New Jersey.

Project Eligibility

Local government vehicles including but not limited to: shuttles, transit buses, garbage trucks, dump trucks, and small Type A/B school buses. Type C/D school buses will be funded by the Electric School Bus program, the third and final round, which is expected to open Summer 2026.

Vehicle(s) being replaced must be decommissioned. Photographic proof of decommissioning must be submitted to the DEP, including: photos of a 3" x 3" hole in the engine block, the chassis cut in half, a clear photo of the VIN and Engine Data Plate, and more. The funded vehicles will be required to have a state-supplied telematic device installed for a period of three (3) years.

This is a reimbursement program. Projects are eligible for advance payments, but final payments will not be disbursed until all vehicles/equipment are delivered and operable and proof of decommission of old vehicles/equipment has been submitted.

Awards will be flat incentive amounts based on vehicle type and class. Additional incentive amounts are available for overburdened communities (OBC) and small governments. The amounts are designed to reflect the approximate incremental cost between a new electric vehicle and a new diesel vehicle plus the cost of a charging station. Incentive amount will be reduced if it exceeds the cost of the new electric vehicle.

Questions

Email StopTheSoot@dep.nj.gov with "Local Government Electrification" in the subject line.
